

Modification Template

Summary of change

Brief description of the change made.

Jira Link: [SDT-XXX](#)

Impact of Change

Does this affect the UI?

Does this affect the checkout process?

Will this be affected when updating PS Wire plugin

Details of change

Purpose of the change... (Include link/url changed)

Files Impacted:

1. wp-content/plugins/wp-pharmacywire-v3-mar/JsonApi/templates/js/json_checkout.js
2. XXXXXXXxx

Code Changes (Code, Screenshot)

- 1.

Code Example

```
function updateForwardPrescriptionOptions() {  
    const pwireComponents = window.pwire.pwire_components;  
    const fwdRxOptions = pwireComponents.prescription.forward_prescription_options;  
    const rxSubmissionMethod = $(''.checkout_form').find(''.rxSubmission_method');  
    rxSubmissionMethod.html('');
```

```

$.each(fwdRxOptions, (key, option) => {
    const method = option.value.toLowerCase();
    rxSubmissionMethod.append(`<input type="radio" id="rx_submission_${method}"
name="rx_forwarding" value="${method}" required><label for="rx_submission_${method}" data-sort-
order="${option.sort_order}">${option.label}</label>`);
});
//Custom code
rxSubmissionMethod.append(`<input type="radio" id="rx_submission_need_rx" name="rx_forwarding"
value="doctor" required><label for="rx_submission_need_rx" >Need Rx?</label>`);
}

```

Image example

```

1027 function updateForwardPrescriptionOptions() : void {
1028     const pwireComponents = window.pwire.pwire_components;
1029     const fwdRxOptions = pwireComponents.prescription.forward_prescription_options;
1030     const rxSubmissionMethod = $('#checkout_form').find('.rxSubmission_method');
1031     rxSubmissionMethod.html("");
1032     $.each(fwdRxOptions, (key, option) : void => {
1033         const method : string = option.value.toLowerCase();
1034         rxSubmissionMethod.append(`<input type="radio" id="rx_submission_${method}" name="rx_forwarding" value="${method}" required><label for="rx_submission_${method}" data-sort-order=${option.sort_order}>${option.label}</label>`);
1035     });
1036     //Custom code
1037     rxSubmissionMethod.append(`<input type="radio" id="rx_submission_need_rx" name="rx_forwarding" value="doctor" required><label for="rx_submission_need_rx" >Need Rx?</label>`);
1038 }
1039

```
